

Automation with AI and MCP Servers using Playwright-Notes-3

- **Installation-** Claude with Playwright MCP Server
 1. Install Claude Desktop for Windows
 2. Configure Playwright MCP Server in Claude Desktop=>Open Claude Desktop=>click on the left bottom corner where your user name is=>click on settings=>click on **Edit config file**=>edit the **claude_desktop_config.json** file (open it with notepad)
 3. In the **claude_desktop_config.json** file add the following

```
"mcpServers": {
  "playwright": {
    "command": "npx",
    "args": [
      "@playwright/mcp@latest"
    ]
  }
}
```

Your final file **claude_desktop_config.json** should look like this:

```
{
  "preferences": {
    "coworkWebSearchEnabled": true,
    "coworkScheduledTasksEnabled": false,
    "ccdScheduledTasksEnabled": false
  },
  "mcpServers": {
    "playwright": {
      "command": "npx",
      "args": [
        "@playwright/mcp@latest"
      ]
    }
  }
}
```

4. Restart the Claude Desktop application by closing it and also click on the **tiny upward arrow icon on your Windows nav bar at the bottom right corner**. Right click on the **Claude icon** and click on **Quit** so it fully closes
5. Open the Claude Desktop application **in administrator mode (right click on the application icon and click on Run as administrator)**=>click on the left bottom corner where your user name is=>click on settings. You'll now see that Playwright MCP Server has been configured with your Claude Desktop application.
6. Type the prompts:
Go to www.wishinfinite.com, then navigate to the E-commerce App section under the Playground tab. Then fill in the username and password in the Login form and submit the form and confirm and verify successful login

Go to www.wishinfinite.com, then navigate to Selectors section under the Playground tab. Then verify different elements like Single Select Dropdown, Multi Select Dropdown, Basic Selectors and Advanced Selectors

Note: If AI+MCP struggles with multi-step prompts, you can refine it using ChatGPT or Claude

- **No Code BDD Testing using Claude-**

Refer to Automation with AI and MCP Servers using Playwright-Notes-2 on how to create a .features file with scenarios and test cases in Gherkin language. Just upload the .features files into Claude and ask it to execute all the test case scenarios

- **API Testing with Playwright MCP and Claude-**

1. Install **executeAutomation server** in Playwright using the below command:
npm install -g @executeautomation/playwright-mcp-server
2. Verify that the above package has been installed using the below command:
npm list -g @executeautomation/playwright-mcp-server
3. Add the following to your `claude_desktop_config.json` file:

```
"playwrightEA": {
  "command": "npx",
  "args": ["-y", "@executeautomation/playwright-mcp-server"]
}
```

Your final claude_desktop_config.json file should look like this:

```
{
  "mcpServers": {
    "playwright": {
      "command": "npx",
      "args": [
        "@playwright/mcp@latest"
      ]
    },
    "playwrightEA": {
      "command": "npx",
      "args": ["-y", "@executeautomation/playwright-mcp-server"]
    }
  },
  "preferences": {
    "coworkScheduledTasksEnabled": false,
    "ccdScheduledTasksEnabled": false,
    "coworkWebSearchEnabled": true
  }
}
```

4. Restart the Claude Desktop application by closing it and also click on the **tiny upward arrow icon on your Windows nav bar at the bottom right corner**. Right click on the **Claude icon** and click on **Quit** so it fully closes
5. Open the Claude Desktop application **in administrator mode (right click on the application icon and click on Run as administrator)**=>click on the left bottom corner where your user name is=>click on settings. You'll now see that Playwright MCP Server has been configured with your Claude Desktop application.

Refer to Automation with AI and MCP Servers using Playwright-Notes-2 for prompts to feed to Claude for API Testing

Refer to this website to install executeAutomation for Playwright MCP-<https://github.com/executeautomation/mcp-playwright>

Installation- Cursor with Playwright MCP Server

1. Cursor and go to the settings icon in the top right corner
2. Select MCP Server from the left menu and click on **New MCP Server** option-this opens the **mcp.json** file
3. Add the following in the **mcp.json** file:

```
{
  "mcpServers": {
    "playwright": {
      "command": "npx",
      "args": [
        "@playwright/mcp@latest"
      ]
    }
  }
}
```

Refer to this website for installation:
<https://github.com/microsoft/playwright-mcp>

4. Enter the below prompts:
go to www.wishinfinite.com, then navigate to the E-commerce App section under the Playground tab. Then fill in the username and password in the Login form and submit the form and confirm successful login. Order any 2 items and under view orders validate that the correct items got ordered. Once all the steps are done log out from the application. Perform all these steps using the Playwright MCP Server
